

Payment gateway reconciliation — Finance Manager summary

Week 1–7 September 2026 (UTC) · NAD · internal_deposits (326 rows) vs gateway_settlement (306 rows)

274 of 306 gateway settlements (90%) match exactly on reference, gross, fee and net. The bridge from our R218,280.00 to the gateway's R217,979.97 leaves R0.00 unexplained. Two of its timing lines are provisional until the adjacent weeks' files confirm them (see assumptions).

Bridge on gross amounts: internal total → gateway total

Line	NAD
Internal SUCCESS deposits, total	218,280.00
– Duplicate internal deposit rows (same settlement counted twice)	(1,300.00)
– Reversals / chargebacks (not in the gateway's SETTLED total)	(850.00)
– Deposits with no settlement yet (mid-week)	(2,700.00)
– Created in the last 15 min, not yet settled (provisional)	(3,650.00)
+ Settled in the first 15 min, no deposit this week (provisional)	2,600.00
+ Settlements with no internal record	2,900.00
+ Settled by the gateway but marked FAILED by us	250.00
+ Duplicate gateway settlement rows	1,550.00
+/- Gross amount differences with the gateway (net)	900.00
+/- Rounding (exactly 1 cent on 3 rows)	(0.03)
= Gateway SETTLED total	217,979.97
Residual (unexplained)	0.00

3 days	5 deposits with no settlement: re-check next file, then escalate	Finance	2,700.00

Material assumptions

- Timing lines are provisional: this week's files can't prove them. R3,650 (3 deposits created 23:54–23:55 on 7 Sep) should appear in the 8–14 Sep gateway file; R2,600 (3 settlements at 00:04–00:06 on 1 Sep, GW-000331 to 333) should match the 25–31 Aug internal file. Finance keeps all six open until matched; any unmatched item becomes a break.
- Fee = 2% of gross + R1.00, to the cent; any fee or net difference of 1 cent or more is flagged. Gross differences of exactly 1 cent (3 rows, R0.03) are treated as rounding, a materiality choice for Finance to confirm. Fee and net errors don't move gross, so they are actions, not bridge lines.
