

Payment gateway reconciliation — Finance Manager summary

Week 1–7 September 2026 (UTC) · NAD · internal_deposits (326 rows) vs gateway_settlement (306 rows)

274 of 306 gateway settlements (90%) match exactly on reference, gross, fee and net. The 49 differences are 34 genuine breaks, 6 timing differences and 9 that are not a problem (exceptions.csv). The bridge from our R218,280.00 to the gateway's R217,979.97 leaves R0.00 unexplained; its two timing lines are provisional (see assumptions).

Bridge on gross amounts: internal total → gateway total

Line	NAD
Internal SUCCESS deposits, total	218,280.00
– Duplicate internal deposit rows (same settlement counted twice)	(1,300.00)
– Reversals / chargebacks (not in the gateway's SETTLED total)	(850.00)
– Deposits with no settlement yet (mid-week)	(2,700.00)
– Created in the last 15 min, not yet settled (provisional)	(3,650.00)
+ Settled in the first 15 min, no deposit this week (provisional)	2,600.00

Week	Did 2 duplicate settlements pay twice? Audit 3 duplicate deposits	Payments	1,550 / 1,300
Week	Confirm the wallet debit for each of 3 reversals	Finance	850.00
3 days	5 deposits with no settlement: re-check next file, then escalate	Finance	2,700.00

Material assumptions

- Timing lines are provisional: this week's files can't prove them. R3,650 (3 deposits created 23:54–23:55 on 7 Sep) should appear in the 8–14 Sep gateway file; R2,600 (3 settlements at 00:04–00:06 on 1 Sep, GW-000331 to 333) should match the 25–31 Aug internal file. Finance keeps all six open until matched; any unmatched item becomes a break.
- Fee = 2% of gross + R1.00, to the cent; any fee or net difference of 1 cent or more is flagged. Gross differences of exactly 1 cent (3 rows, R0.03) are treated as rounding, a materiality choice for Finance to confirm. Fee and net errors don't move gross, so they are actions, not bridge lines.
